UI Developer

Stellar seeks a UI (Front-End) Developer who will be excited to work on transformational web experiences for some of the world's top brands. You will be working in cross-functional teams alongside user experience designers, visual designers, strategists, and other engineers to create innovative solutions and bring ideas to life in code. UI Developers at Stellar are part of highly creative and technically innovative development teams responsible for building sites and applications for our clients, participating in hands-on application development efforts for various web-based business applications.

The Role

- Translate design comps into HTML5/CSS3+ pages
- Solve business issues by identifying and analyzing detailed requirements to reflect clients' needs that translate into system designs
- Resolve issues and remove project barriers for clients and internal teams
- Architect, develop and deploy websites
- Collaborate with other engineers in application development and best practices

The Top Things We're Looking For

- 6-8 yrs. experience with HTML5/CSS3+, JavaScript, AJAX, and Content Management Systems.
- Experience using JS Frameworks (React, Angular, Node, Backbone, Ember, JQuery, etc…)
- Extensive knowledge of modern CSS practices for responsive web design and is comfortable working with CSS processors such as SASS or LESS
- Comfortable using build and package management solutions such as Gulp, Grunt, WebPack, and npm
- Knowledge of .NET, Java, PHP and other web development platforms is a plus.
- Proficient in using Git code repositories, and understands processes and practices for branching, pull requests, merging, etc.
- Solid understanding of cross-browser/platform issues and code solutions
- Passion for front end development, and keeps up with the latest updates, releases, and trends across the field. Enjoys being part of the web development community.
- Understands RESTful API best practices and managing asynchronous data
- Comfortable working with remote team members, and collaborating with English-speaking team members
- Familiar with Photoshop and/or Sketch to review designs and export assets, etc.
- Excellent debugging and problem-solving skill
- Understands server-side scripting (Node.js, PHP, .Net, Java, Python, etc.). Bonus if you have any hands-on experience writing server-side code or working with databases.
- Self-motivated, organized and accountable
- Humble in victory, constructive in defeat
- Willing to fight for good ideas, but always a team player

- Self-starter, driven, focused, eager
- Bachelor's Degree or equivalent work experience in digital and marketing
